

Sl. No.	AREA OF RESEARCH
1	Short circuit withstand capability of transformers
2	Seismic Qualification of Instrument Transformer
3	Non-destructive evaluation (NDE) of turbines deployed in thermal power stations
4	Polymer nanocomposites for PV cable application
5	Performance evaluation of transformers
6	Dynamic protection scheme for distribution system with EV charging
7	Narrow transmission line tower
8	Miniature circuits breaker (MCB)
9	Hybrid materials for supercapacitor applications.
